Programs within JFI

ADARE is the Administrative Data Research and Evaluation alliance of nine state partners covering 43 percent of the U.S. civilian labor force.
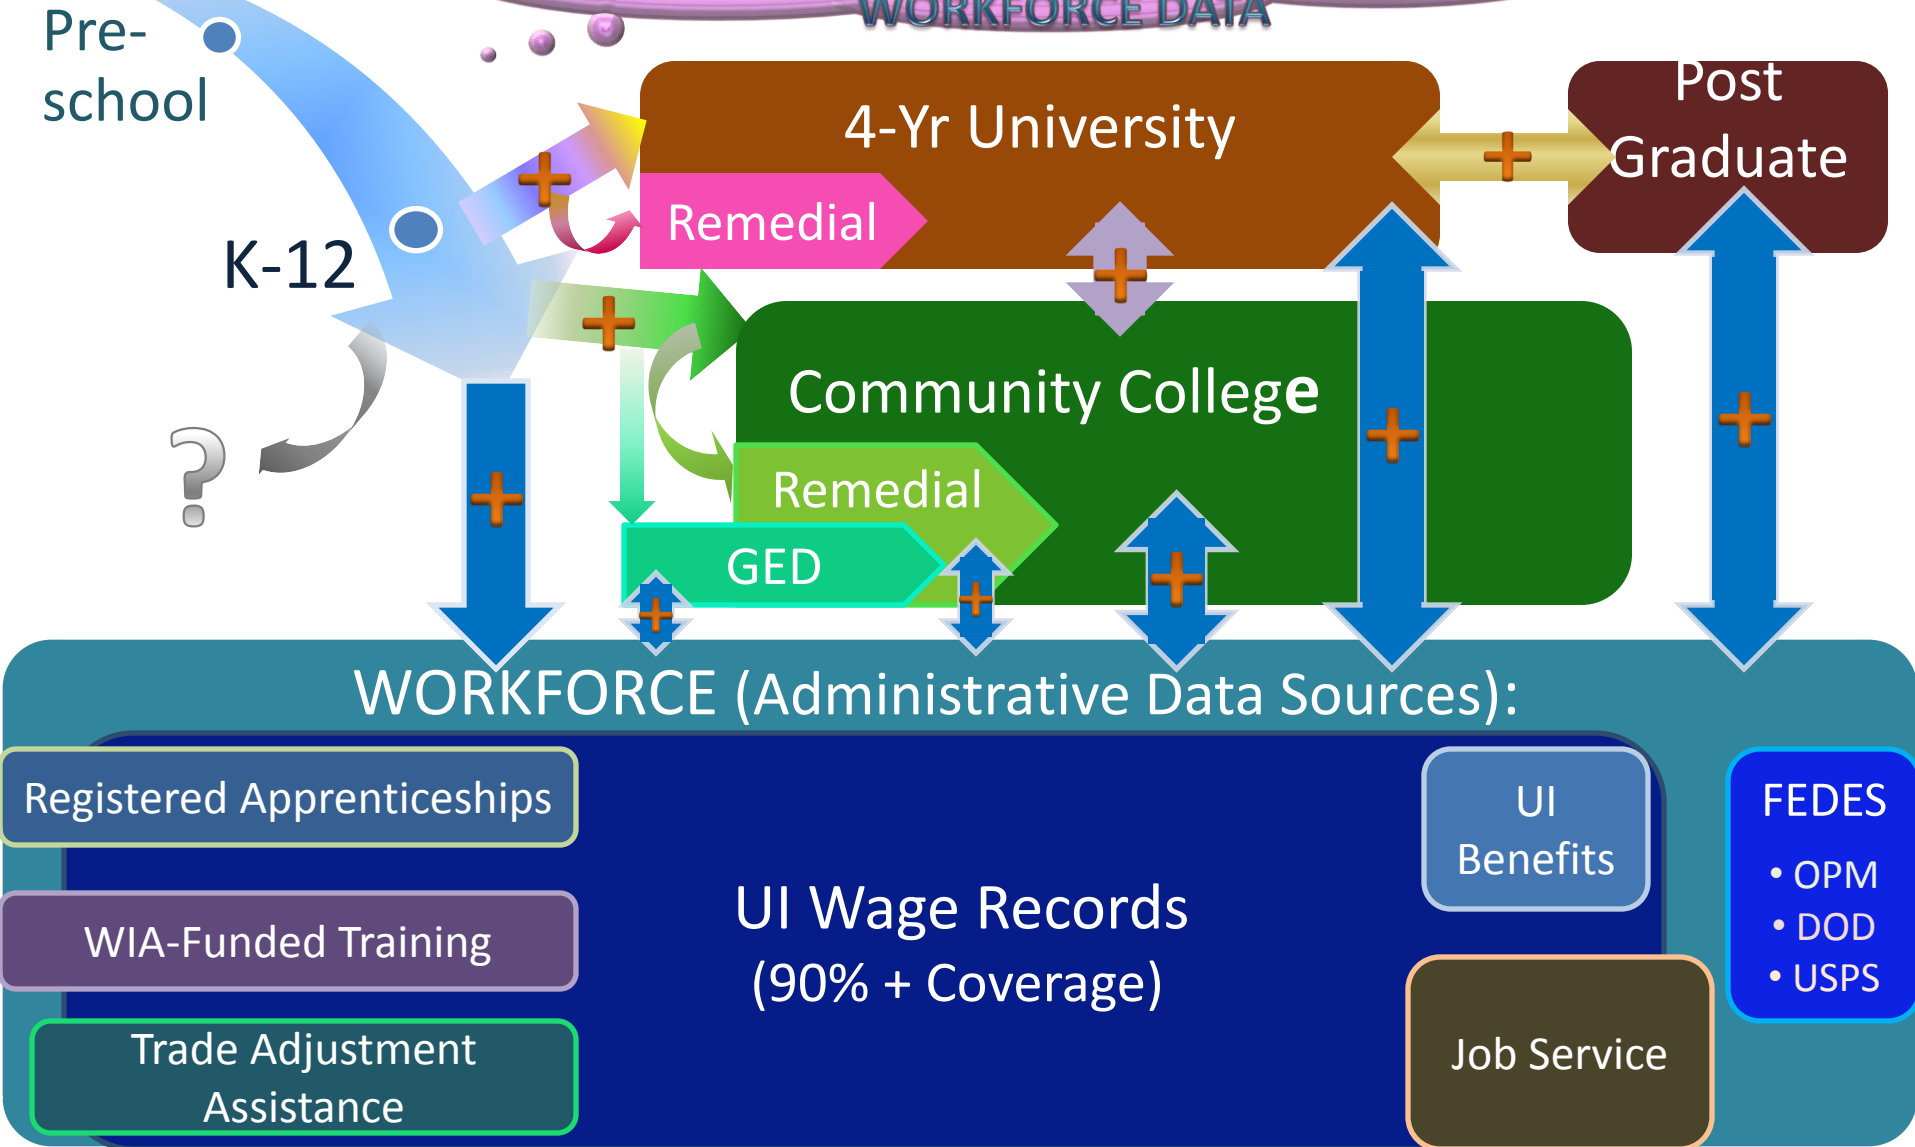

The mission of the ***Labor Market and Education Program*** is to develop valid and reliable measures of the performance of employment training and cash assistance programs and related support services, and to study how often and in what combination these investments touch defined target groups.

The ***Economic and Workforce Development Program*** provides research and technical assistance to government, nonprofit and private sector clients on economic, fiscal and workforce development issues.

The ***Human Services Program*** provides statistical information and research on the provision of human services in Maryland, with application to the nation as a whole.

The goal and mission of the ***Baltimore Neighborhood Indicators Alliance*** is to provide accurate data and objective research to a wide range of groups, organizations, and agencies that result in positive policy change.
